Kramer Bros. Nurseries

NURSERIES LOCATED ONE AND ONE-HALF MILES EAST OF
UPLAND ON FOOTHILL BOULEVARD, U. S. No. 66

ONTARIO, CALIFORNIA

Terms of Sale

ACCEPTANCE OF ORDERS—We accept all orders on condition that same shall be void should any injury befall our stock from fire, frost, floods, drouth, or any other cause which could not be prevented and over which we have no control.

GUARANTEE—We exercise great care to have our nursery stock true to name; nevertheless it is understood that should any stock prove otherwise, we shall not be liable for any sum greater than that paid us for only such stock as shall prove untrue.

TERMS CASH—All prices payable F. O. B. Ontario, unless otherwise designated.

Description of Nursery and Growing Conditions

One of our nurseries is located in the Foothill Section known as the Orange Belt of Southern California. It is situated on the U. S. Highway No. 66, the main road leading to the East.

At this plant we produce our Iris, Heather, Chrysanthemums, Camellias, Cocos Plumosa Palms, Roses, and such stock as requires a frost-free locality. We have seventy acres devoted to this class of plants.

Our Freesias, Ranunculus and Anemones are grown at our Oceanside Grounds at Oceanside, California.

Visitors are always welcome.

KRAMER BROS. NURSERIES

P. O. BOX 2, ONTARIO, CALIFORNIA

Nurseries located one and one-half miles east of Upland on
Foothill Boulevard, U. S. No. 66.

OCHROLEUCA IRIS

The finest of all Irises for early summer cut flowers. They last a long time with several blossoms 6 inches across coming out in succession. Plants grow from rhizomes out of doors and become more prolific each year without transplanting. Hardy anywhere in the United States.

We have sold as many as fifty thousands rhizomes to single customers, and hundreds are increasing their profits with this item. It has been proved profitable from Seattle to New York, and in the south; a consistent item on the cut flower markets.

	Per 10	Per 100	Per 1000

GERBERAS—JAMESONIA HYBRIDS

	Per 100	Per 1000
Strong divisions, bench size, mixed colors.....	\$ 6.00	\$50.00
Strong divisions, reselected for greenhouse use, mixed....	15.00	125.00

GERBERAS

Long blooming season and heavy production of flowers have made gerberas a good greenhouse item. It only takes a few flowers in a mixed bouquet to put it in the high quality class. Plant our strong divisions in deep benches or ground beds where there is good drainage; plenty of sand and peat. Keep the soil slightly alkaline with lime. Water thoroughly each time but allow the soil to dry out between waterings. Small quantities may be planted in deep lily boxes which may be brought outside in warm weather or in milder climates, the divisions may be planted outside after the danger of frost is over and the clumps brought in to the greenhouse before frost in the fall. Night temperatures should be about 50-55 degrees. You will find over a year period that your planting of gerberas will have paid you well per square foot.

FIELD VIEW OF CHRYSANTHEMUMS

Protected by the beautiful Southern California foothills is this large field of chrysanthemums. We have made every effort to produce and collect the very best commercial varieties available. The location here is ideal for chrysanthemums—for cut flowers, and especially for cuttings. Our plants are grown throughout the year in well spaced rows to provide plenty of air and light so necessary for good cuttings.

Being grown outside all the year around and not forced in any way we cannot begin to ship cuttings until about April 15th which is the normal sprouting season. You may be assured that our outside grown cuttings are clean, strong and vigorous, and well rooted; free from midge and the usual pests. Our customers are assured success. Prices are all quoted net at destination on mum cuttings only, the buyer to pay the express and deduct from the bill. A two percent discount is allowed for payment within ten days.

The safe arrival of shipments is assured by daily ice-cooled refrigerator express service. We guarantee their arrival in good condition and that our stock is true to name—not to exceed the purchase price.

Prices on 'mum cuttings are listed F. O. B. your establishment.

SUE SALLY JONES

SILVER LACE

BUTTERFLY

GENA HARWOOD

NEW JAPANESE SPIDER 'MUMS'

SUE SALLY JONES—Your customers cannot resist this one. This lovely flower is of medium size—seven to eight inches across, and is very full and double. The gracefully curved needle-like petals are of clear medium bronze with a slight golden tinge. It is a remarkably good growing variety, and carries the flowers on substantial stems. Blooms November 5. Single plants out of two inch pots are \$1.00 each, per dozen \$10.00, \$50.00 per hundred.

SILVER LACE—Every up-to-date florist should grow a bunch of these new Japanese spider chrysanthemums. Your clientele is demanding something different and distinctive which you can supply with such items as these. The varieties now being listed here are much improved in their keeping qualities, production, and general characteristics. Silver Lace is a good full double white, very pleasing. Blooms November 5th. We are now able to offer these at popular prices. \$2.50 per dozen, \$15.00 per hundred, \$100.00 per thousand.

BUTTERFLY—Few in its class compares with this large feathery spider 'mum in production. It may be grown to advantage either as a disbud, or as a pompon. The color is a good golden yellow. Blooms November 5th. \$1.50 per dozen, \$8.00 per hundred, \$75.00 per thousand.

MISS GENA HARWOOD—Another of the popular quilled type chrysanthemums. The flower is full double and makes a beautiful item for table work. The color at the center is a deep coffee color shading to light tan at the tips. Blooms November 10th. \$1.50 per dozen, \$6.00 per hundred, \$50.00 per thousand.

NEW JAPANESE NOVELTIES

PRIDE OF SUNNYSLOPE

ALICE TASHIMA

MAMORU TASHIMA

SOUVENIER

PRIDE OF SUNNYSLOPE—A more attractive form of any 'mum' is hard to find. Tall and stately it stands out well amid the usual profusion of flowers at the mid season. Flowers are of deep lavender color. November 5th. We can supply this variety now at \$2.50 per dozen, \$15.00 per hundred, \$100.00 per thousand

ALICE TASHIMA—This is a pure white flower of long pendulant tubular petals which, when extended, measure from six to eight inches across the flower. It is very delicate appearing, yet it is of good substance and a reliable grower. This variety has kept in perfect condition for more than two weeks after cutting. Especially adapted for corsage work. Blooms Oct. 25th.

MAMORU TASHIMA—Few other 'mums' can compare in color intensity of this rich golden yellow flower. It is a medium sized flower and well made up. Not least among its admirable characteristics is its good keeping quality. Blooms October 30th.

SOUVENIER—A full double large quilled type of the beautiful salmon pink shade. It is especially good disbudded and grown three or four to a plant. Grown in this way this flower should make a diameter of from six to eight inches. Stems are strong and rigid. Blooms October 25th.

Plants of the above varieties are at \$1.00 per dozen, \$6.00 per hundred, \$50.00 per thousand, delivered to you.

KRAMER'S LATE WHITE

(Patent rights reserved)

White is always the best seller in the late pompon period. Here we have a good clear white single that cannot be beaten in production by any other late pompon with which we are familiar. It has quality, too. There are six or eight rows of petals, making up a good substantial flower. Stems are rigid and soft enough to take water well, and the flower spray is such that they bunch nicely.

A plant patent has been applied for and this variety will be sold only with plant patent restrictions.

Last year our first cut was made on January 10th from stock grown in the field and cut back in September, but normal blooming may begin as early as Christmas under other conditions. Cuttings are available at \$15.00 per hundred, \$125.00 per thousand.

FIELD ROW OF KRAMER'S LATE WHITE

This photograph was taken of a single row of Kramer's Late White on December 20th. The cuttings were planted in the field July 15th, cut back once on September 5th. It was not given any special attention but the growth far exceeded all other varieties, there being 10 to 12 flower stems per plant, all well flowered and making a height of 2½ to 3½ feet. The flowers began to show color December 10th, but were not ready to cut until December 20th, just as this photograph indicates. By pinching back even later, as is possible, maturity can be made later if desired. Last year we had equally good crop coming the 10th of January.

The cuttings of this variety are available this year with patent papers (Patent rights are reserved). See page 10 for further description and prices.

NEW VARIETIES 1941

ESTHER RUTH

PINK PERFECTION

KRAMERS ROSE

SANTA ANITA

ESTHER RUTH—This light bronze color is one that sells well, especially on the late market. Esther Ruth is a large single flower with four or five whorls of petals opening flat and showing a neat center. The flower texture is hard such as is required for good shippers. It grows easy and stems are good. Blooms November 25th.

PINK PERFECTION—From our large field of seedling pompons we have selected this beautiful deep pink as especially attractive, and it is one that has attracted attention from florists visiting our fields. It is a large decorative type three to four inches across with ten to twelve rows of petals, the outer ones being slightly reflexed. There is a tendency toward fasciation of the terminal bud which may be removed if desired. They are at their best about November 25th.

KRAMER'S ROSE—This is another fine large daisy pompon for the late season. The color is a good clear deep rose. Production is good, and growing habits are excellent. You will be proud to grow this variety. Blooming date, November 20th.

SANTA ANITA—A distinct improvement over the well known and popular Ida Catherine Skiff, being much like it in color and form, but much more prolific and a taller grower. It is a nice clear medium bronze single. It may be grown as a pompon or a China mum. Blooms October 25th.

Prices for rooted cuttings of the above varieties are at \$15.00 per hundred, \$125.00 per thousand, delivered to you. 250 are at the thousand rate.

KRAMER'S MORI WHITE

KRAMER'S MORI APRICOT

MARIE KRAMER

SAN DIEGO

KRAMER'S MORI WHITE—Well known on the western markets are these two seedlings of Mr. Mori. To any casual observer they would be picked as outstanding and particularly salable because of their beauty and form. To a grower they are even more attractive for they are naturally easy growers, having good soft yet strong straight stems and luxuriant green foliage; fine vegetative habits. Kramer's Mori White is a large single type with several whorls of clear glistening white petals which are slightly reflex at the tip. The light green center is slightly conical and very much more attractive than the usual cushion. Disbudded and grown five or six to the plant perfect flowers six inches in diameter are produced. It is a very good keeper. Blooming date is October 15th.

KRAMER'S MORI APRICOT—This variety is almost an identical twin to Kramer's Mori White except for the deep apricot color. It is radiant with this lovely shade which is so congenial and usable for every occasion. There is good demand for such quality flowers. Blooms October 15th.

MARIE KRAMER—Really good red pompons which do not fade are in good demand, especially so in the December season at which time Marie Kramer comes to bloom. We believe we have a real asset in the red class. Marie Kramer is a Hasegawa Poinsettia hybrid of deep poinsettia red very similar to that of its parent; just as attractive and just as prolific. The flowers maintain their deep red shade even in full sunlight. One distinct advantage over Hasegawa Poinsettia is its keeping quality. The stems are much more tender and water absorbing, and the flower itself smaller and fuller, there being several whorls of petals. You will find Marie Kramer a good red for December sales. Blooms December 1-10.

SAN DIEGO—Here is a good late yellow pompon of good substance. Flowers of rich yellow two to two and one-half inches in diameter are borne on strong free branching stems. The variety is very prolific and will produce good quantities of flowers late in the mum season. Blooms December 10-15.

Prices for rooted cuttings of the above varieties are at \$7.00 per hundred, \$65.00 per thousand delivered to you. 250 are at the thousand rate.

KAINO PINK

CALIFORNIA PRIDE

KAINO PINK—This is a good solid pompon of the lovely Valencia pink shade. It is fully double, two and one-half inches or more in diameter when grown as a spray, or four or more inches when disbudded. There is no wonder that it is so much called for by the shippers as it holds its shape well and does not shatter. It grows easily. Cutting may begin about November 25th. Cuttings are at \$8.00 per hundred, \$75.00 per thousand.

CALIFORNIA PRIDE—Many commercial growers here like this good deep pink pompon. It is a good large full double with pleasing characteristics. It produces heavily, cuts easily, and makes up nice bunches. Blooms November 15th. Cuttings are at \$8.00 per hundred, \$75.00 per thousand.

KRAMER'S DARK PINK VALENCIA—A number of sports of the well known and popular Valencia are on the market, among which this California production ranks well. It has all the good characteristics of Valencia with the added advantage of a much deeper pink color. It is also a better grower. It blooms several days later than Valencia. Cuttings are at \$8.00 per hundred, \$75.00 per thousand.

From New York: "Your plants arrived in splendid shape."

From Ohio: "The mum cuttings you shipped to me were very nice and arrived in good condition. They are growing into the finest plants I have in my houses."

Washington: "We are enjoying the mums very much—not a poor one in the lot."

TREASURE ISLAND

CALIFORNIA GOLD

SAN CARLOS

SAN ANTONIO

TREASURE ISLAND—The Treasure Islands have made good. The three forms, white, yellow and pink, are identical except for color. They are classed with the large decorative pompons being three inches or more across and full double. Good strong plants cut back in September will come to bloom just in time for Christmas, and you won't have to worry about short stems. These three varieties are grown extensively here for the floats in Pasadena's Tournament of Roses on New Year's day. Use all three colors, yellow, white and pink. Everyone should have these new additions for their late pompon crop. December 20th and later.

CALIFORNIA GOLD—A single yellow of good deep color and good substance. Flower petals are borne regularly as if placed around a golden center. Nice heads with strong stems are characteristic. Blooms from November 15th.

SAN CARLOS—There is a large place on the markets for flowers such as this one. It has the familiar Japanese sturdiness and productivity which are so much an asset to any commercial pompon. The flower is about 3 inches in diameter with neat regular petalage and comparatively large clear yellow cushion. The color is a clear bronzy red shading to deep bronze. It blooms somewhat later than our Japanese Red. November 15th.

SAN ANTONIO—One of the finest disbudded pompons is this large double pink. Stems are strong and straight and easily disbudded. Foliage is good well up to the flower. It is good as a pompon, too, producing good flower heads. November 15th.

MOTHER OF PEARL—Medium sized double pink pompon of good quality and substance. It is ready to cut about November 20th.

CAVALCADE—Medium solid Mandarin red. Blooms December 10th.

Prices for rooted cuttings of the above varieties are at \$4.00 per hundred, \$35.00 per thousand, delivered to you.

PACIFIC COAST VARIETIES OF 1938

MRS. A. KRAMER.

KRAMER'S BUFF-ORANGE

HASEGAWA ORANGE

PASADENA

LOS ANGELES

JAPANESE RED

« Daily refrigerator service brings our cuttings to you in perfect condition. »

PACIFIC COAST VARIETIES OF 1938

MRS. A. KRAMER—This flower is of clear solid pink with nice long wiry stems and good foliage. It is a beautiful sight in the field, and a prize winner to the retailer. Flowers are five inches or more across when disbudded. Blooming date is November 5.

HASEGAWA ORANGE—This medium sized pompon is of a delightfully beautiful deep buff with a light orange cast. Flowers are well placed on long stems making flower combinations easy and graceful. It is a good semi-double with petals partially covering the bronzy center. You will find this a good seller irrespective of competition. November 10.

PASADENA—This is just what the trade is demanding, a vivid bronzy orange, medium sized pompon with broad ray flowers which partly cover the yellow center. It has nice growing habits. Blooming begins November 1st.

LOS ANGELES—A good semi-double clear scarlet flower $2\frac{1}{2}$ inches in diameter and larger. The silvery crimson of the under side of the petals shines as if to set off as a gem the partially showing bronze cushion. It is a good keeper, too. November 15th.

JAPANESE RED—A sturdy strong stemmed variety grown in the large California plantings. Flowers are medium sized with several rows of petals. As with many reds the deep color fades to a nice shade of clear bronze. Nov. 1st.

Cuttings of these varieties are now at \$3.00 per hundred, \$27.50 per thousand.

DAWN

HASEGAWA JOSEPHINE

HASEGAWA PINK

HASEGAWA MINORU

« Buy healthy outside grown cuttings. »

\$3.00 per hundred, \$27.50 per thousand.

LIGHTHOUSE

LIGHTHOUSE—This single pompon is so striking it is one of the first to be recognized in the field. Flowers are of watermelon red shading to a clear bronze make a pleasing and graceful effect. Production is well above the average; free blooming with ample stem and foliage. It has been universally popular because it is a money maker. You should have this single variety. It may be shaded with good success. Blooms November 1-15. Cuttings of this variety are now at regular price, \$3.00 per hundred, \$27.50 per thousand.

CORDOVA

WM. SABEY

GLADYS DUCKHAM

HASEGAWA GOLD

\$3.00 per hundred, \$27.50 per thousand.

GOOD STANDARD VARIETIES OF POMPONS

\$3.00 per hundred, \$27.50 per thousand.

5 inch pot	1.50
6 inch pot	2.50
8 inch pot	3.50
5 gallon cans	5.00

Large specimen sizes quoted on request.

These plants are shipped out of pots in spring.

CAMELLIA CULTURE

Camellias are one of the most popular items for corsage work, and rightly so for their beauty is almost unsurpassed. They make up easily, and are easily grown. Every establishment should have plantings of its own from which to cut; they are heavy producers and bloom consistently each year, beginning before Christmas and carrying through until March or April. In order that you may have the best results with our plants we make a practice of shipping in spring just before the buds appear. You may be sure of good bloom the first season and every year for a long period. When our plants are received they should immediately be repotted or planted in benches, using light soil with about half acid peat. The peat helps to maintain the slightly acid condition necessary for their good health. After blooming they may be given some heat to force growth, but should be kept as cool as possible and shaded throughout the summer. If they are in containers they may be moved outside to a cool place, and the pots plunged. When buds are set they should be kept in a cool house where the night temperature does not exceed 50 degrees. Commercial fertilizers are the best, cotton seed meal being one of the most commonly used.

STRELITZIA REGINAE, Bird of Paradise—

Large blooming clumps \$2.50 each

Four or more bloom spikes..... 5.00 each

OUR HEATHER FIELD

Erica Melanthera is the best heather for winter cutting. From our large planting we begin cutting in December, and continue shipments through February. Try a \$5.00 or a \$10.00 box of Kramer Brothers heather this year.
